

Hi there. Nitori here.

So, I bought Volume 9 just now, and I have to say, I'm kind of disappointed.

Usually, each Volume includes a unique extra that makes the purchase worthwhile.

However, Volume 9 only included this page, and a recycled copy of the Cave of Trials extra (that rellō translated ages ago; marked as Chapter 23.5), and the omake of Chapter 77.1.

Even though he recycled the omake of 77.1, he downright forgot to put in the second page of the omake, which leaves book-readers at a cliffhanger for no reason. Try reading it again, without reading the second page.

The Cave of Trials recycle has a few panels of redrawn art, but nothing else changed.

Anyway, enjoy this page for what it's worth, and join our Discord to hang out :P.
